Thanks Ed. Hope not to bother you much, but good to know of expertise we might have to draw upon. Have a good one and good luck in Maine - Dana

My personal cell phone number is [Personal Phone/Ex. 6] and my work cell is (857) 829-8220. I may not be in cell range for much of Tuesday through Friday as I will be in central and the mid-cost Maine at the Eastland Woolen Mill and then Callahan Mine sites. I will be attempting to check email from the hotel each morning and evening. I will also be checking my voice mail.

Not sure how spell check missed your typo. Thanks for flagging; I just got off the phone with Josh and others in the EOC and they are looking at it as we speak. Thanks! – Dana

Ps – Ed, I might want to put you on speed dial this coming week as questions come in and Shahid and others are on the road. I know you have a public meeting one day, but am wondering if you might be an on-call resource if questions come up. Let me know; thanks - Dana

There is an apparent one row shift for the total data in Column Q on the spreadsheet. I apologize for my type in my message below where I misspelled shift.

Josh and Dana,

Please see Ed Hathaway's message below as there may be an error on the attached spreadsheet from EPA's website on the Gold King Response. Column Q may be off for not only Lead but also Zinc which shows up as Zero. Column Q also has numbers that I am wondering about for total cadmium, arsenic, and nickel. Maybe it is just a spreadsheet error. Could we please check with the Region. Thanks!

Shahid,

Not sure if you can address this. The attached spreadsheet is on the EPA website for the Gold King response. Column Q row 43 shows lead as 8,700 ug/l. There is obviously a row shift for that column in the spreadsheet. The sample ID is ADW-021-150810-11. Would not want the news reporting 8 ppm of lead in the water.

Not sure if you can get this message to someone who can correct the spreadsheet.

Ed
